Jim,
The "Rich Friedes" you're working with, is he EPA's Rich Freitas or is that someone in your company?

Subject: RE: George AFB conference call

James,

Sounds good to me. I will meet you in Room 907 at 2 PM on Thursday. If you think it would be a good idea to take a look at Joe's sampling plan before Thursday, I can arrange to have someone pick it up the copy from EPA on the 14th floor.

I have come up with a list of suggested wells to obtain split samples from during the November 1998 sampling round.

Well Aquifer Analysis Rationale

NZ-39 Upper Aquifer VOCs Monitor TCE hot spot near edge of upper aquifer

NZ-51 Upper Aquifer VOCs Monitor edge of TCE plume near FT-20

NZ-65 Lower Aquifer Dieldrin Monitor dieldrin in the lower aquifer

NZ-80 Lower Aquifer VOCs Monitor low TCE concentrations downgradient of FT-20

Let me know if there are wells you want to add to or delete from the list.

I need to call Rich Friedes to let him know how many samples for what analyses we will be submitting.

I also have a couple of questions for you.

1. I received the AF's response to comments on the Draft Revised Work Plan Remedial Activities at Sites WP-17, FT-19a, FT-19b, FT-19c, OT-51, and Oil/Water Separators. When do you need comments for this document?
2. When would like comments on the Norton AFB April 1999 Groundwater Sampling Data Results Report?
3. Could you forward me a copy of the comments sent to the AF on the Draft Soil Vapor Standard Operating Procedure. It might be good for me to look these over before the conference call on Thursday. I received Montgomery Watson's Vapor Probe Sampling Protocols, dated October 1, 1999 by fax on Friday so I will take a look at that before the call also. Comments on the George AFB Process Monitoring Report, 2nd Quarter 1999 will be coming to you on October 7th.

Thanks,

Jim

<< File: Header.TXT >>

Jim,

I found my copy of the October 98 sampling plan by Joe

Eidelberg. Suggest we

meet in room 907 at 2PM in my office for the conference call

and you can borrow

the sampling plan at that time as well.
